Enjoy a Wide Variety of Content for Longer with OTT Service, High Device Connectivity, and a 20,000 Hour Lifespan

Smart (webOS) | Apple AirPlay 2 & HomeKit | Screenshare | 20,000 Hour-long Lifespan

High Picture Quality, Large Screen, and Rich Sound for Even Deeper Cinematic Immersion

Real 4K | Ultra Short Throw | 2500 ANSI Lumens Brightness | Up to 120-inch Screen Size | 2.2Ch 40W Sound with Quad Woofer | Bluetooth Surround Ready

The HU715Q offers you 4K UHD picture quality for an awe-inspiring movie experience.

Thanks to the Ultra Short Throw, 0.22 of throw ratio, the HU715Q offers an immersive cinematic screen up to 120-inches from 31.7cm away.

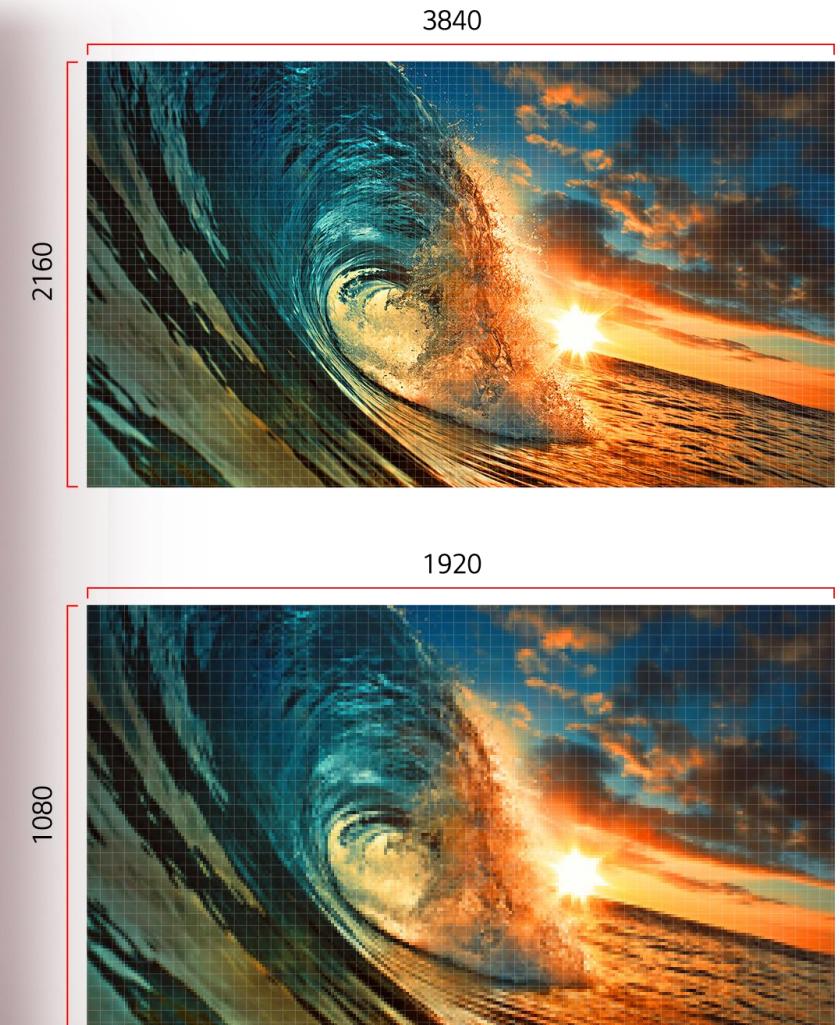

The HU715Q also has a brightness of 2500 ANSI Lumens and can even be used in moderately bright spaces.

Its 20W+20W built-in stereo speakers replicate the experience cinematic sound right in your own home.

Brilliant Home Cinema with Realistic 4K Picture Quality

Real 4K (3840x2160)

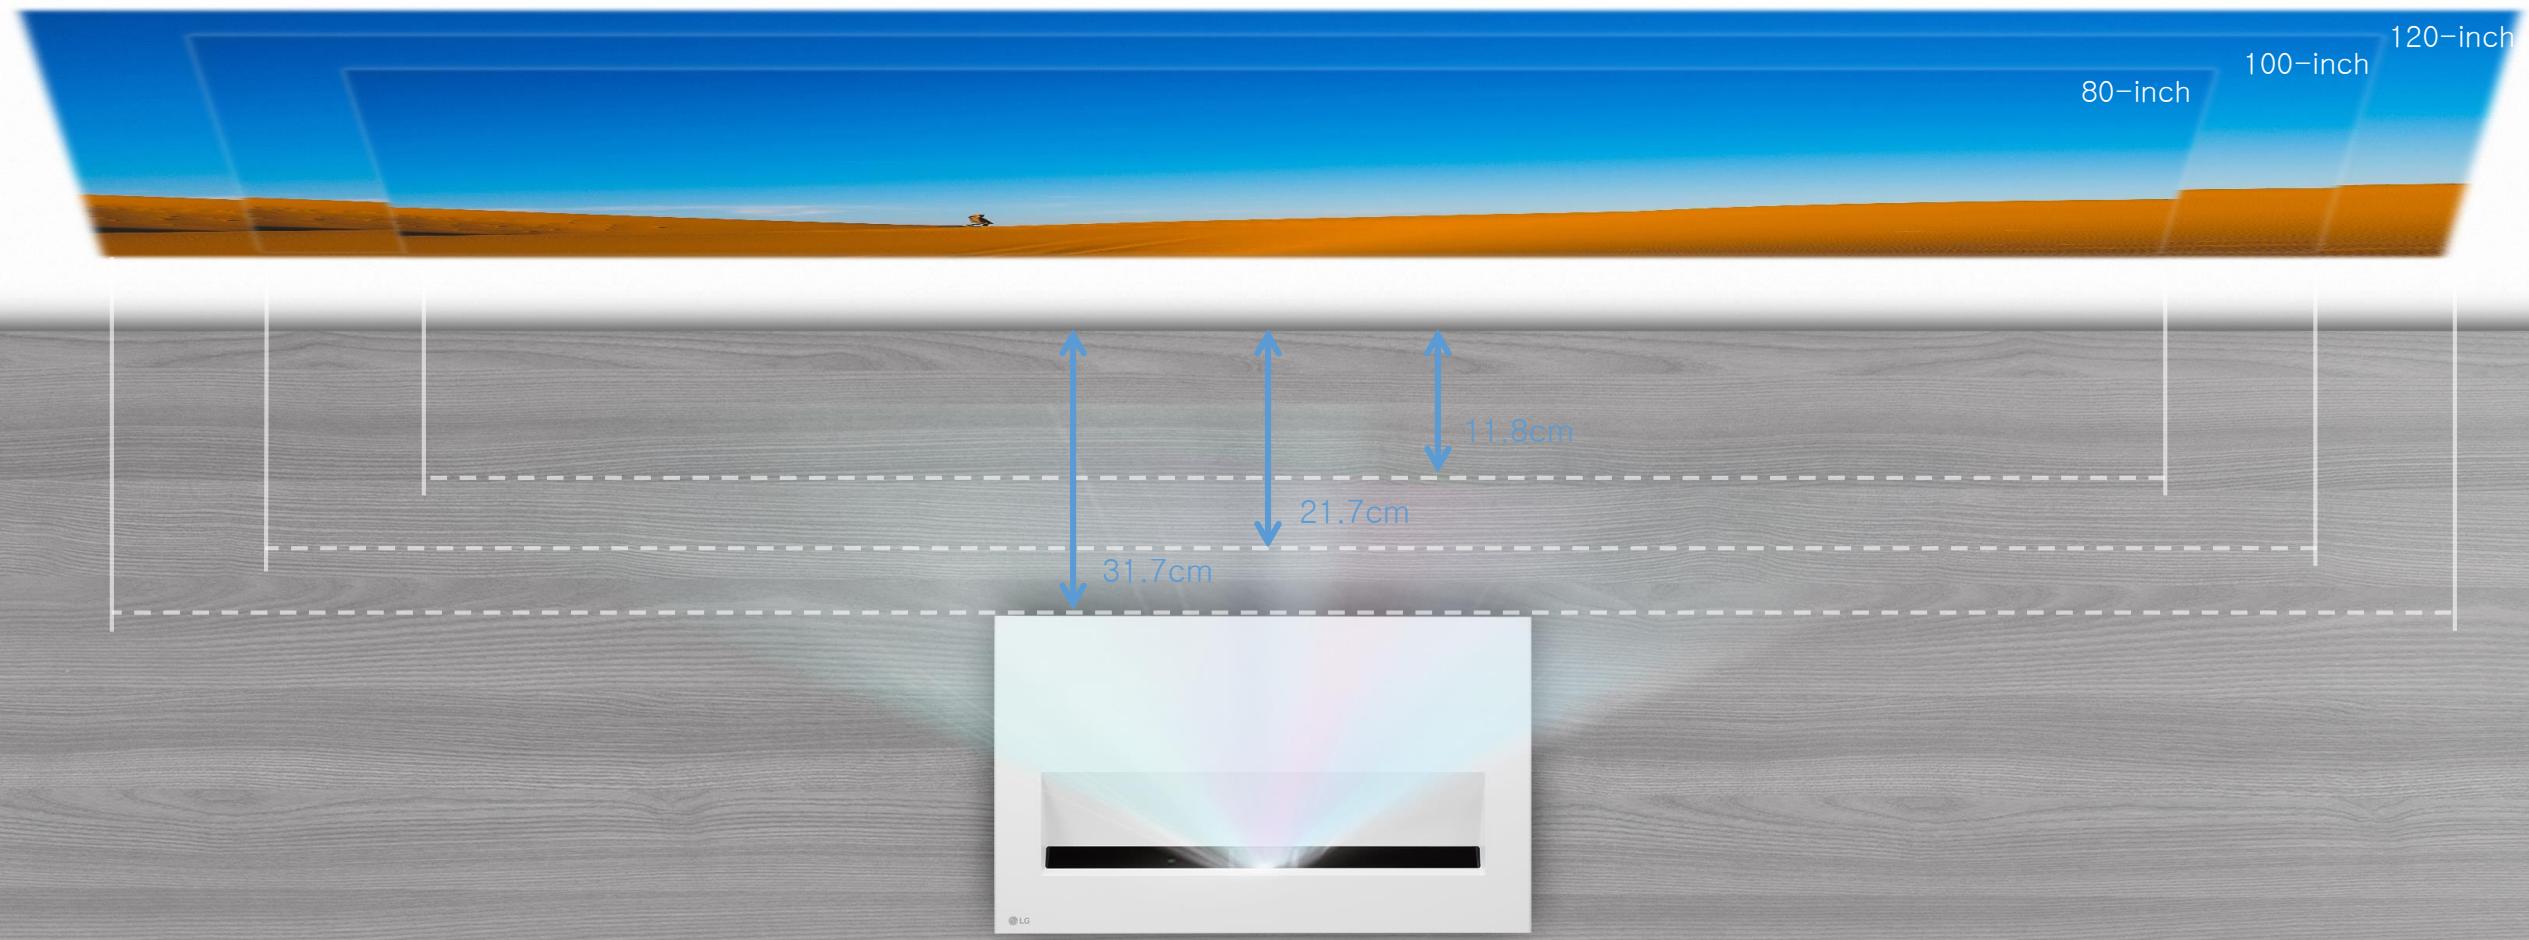

The HU715Q brings you a truly cinematic experience with an incredible 8.3 million pixel screen. Through the use of XPR technology based on Texas Instruments' 4K/UHD DLP technology, the screen can be quickly adjusted in four directions to obtain a maximum resolution of 3840×2160. The HU715Q delivers impeccable precision and detail at four times the resolution of Full HD meaning that even images up to 120 inches remain clear and crisp.

Incredibly Short Throw Ratio of 0.22

Ultra Short Throw (Throw Ratio 0.22)

With the HU715Q's advanced Ultra Short Throw, you can enjoy an 80-inch cinematic screen by placing your projector just 11.8cm away from the wall. For the maximum, 120-inch screen size, the HU715Q can be placed merely 31.7cm from the wall. Simple, efficient set up and compact design ensures it's easy to get stunning viewing experiences on a realistic cinema scale in your own home.

Clear Cinema Picture Quality in Daylight Luminance

2500 ANSI Lumens Brightness

The HU715Q has a brightness of 2500 ANSI lumens, providing you with true-color images, even in daytime lighting conditions. These brighter and clearer images make it possible to watch movies at home without the need to completely block outside light in daytime.

Deeper Immersion with a Bigger Screen

Up to 120-inch Screen Size

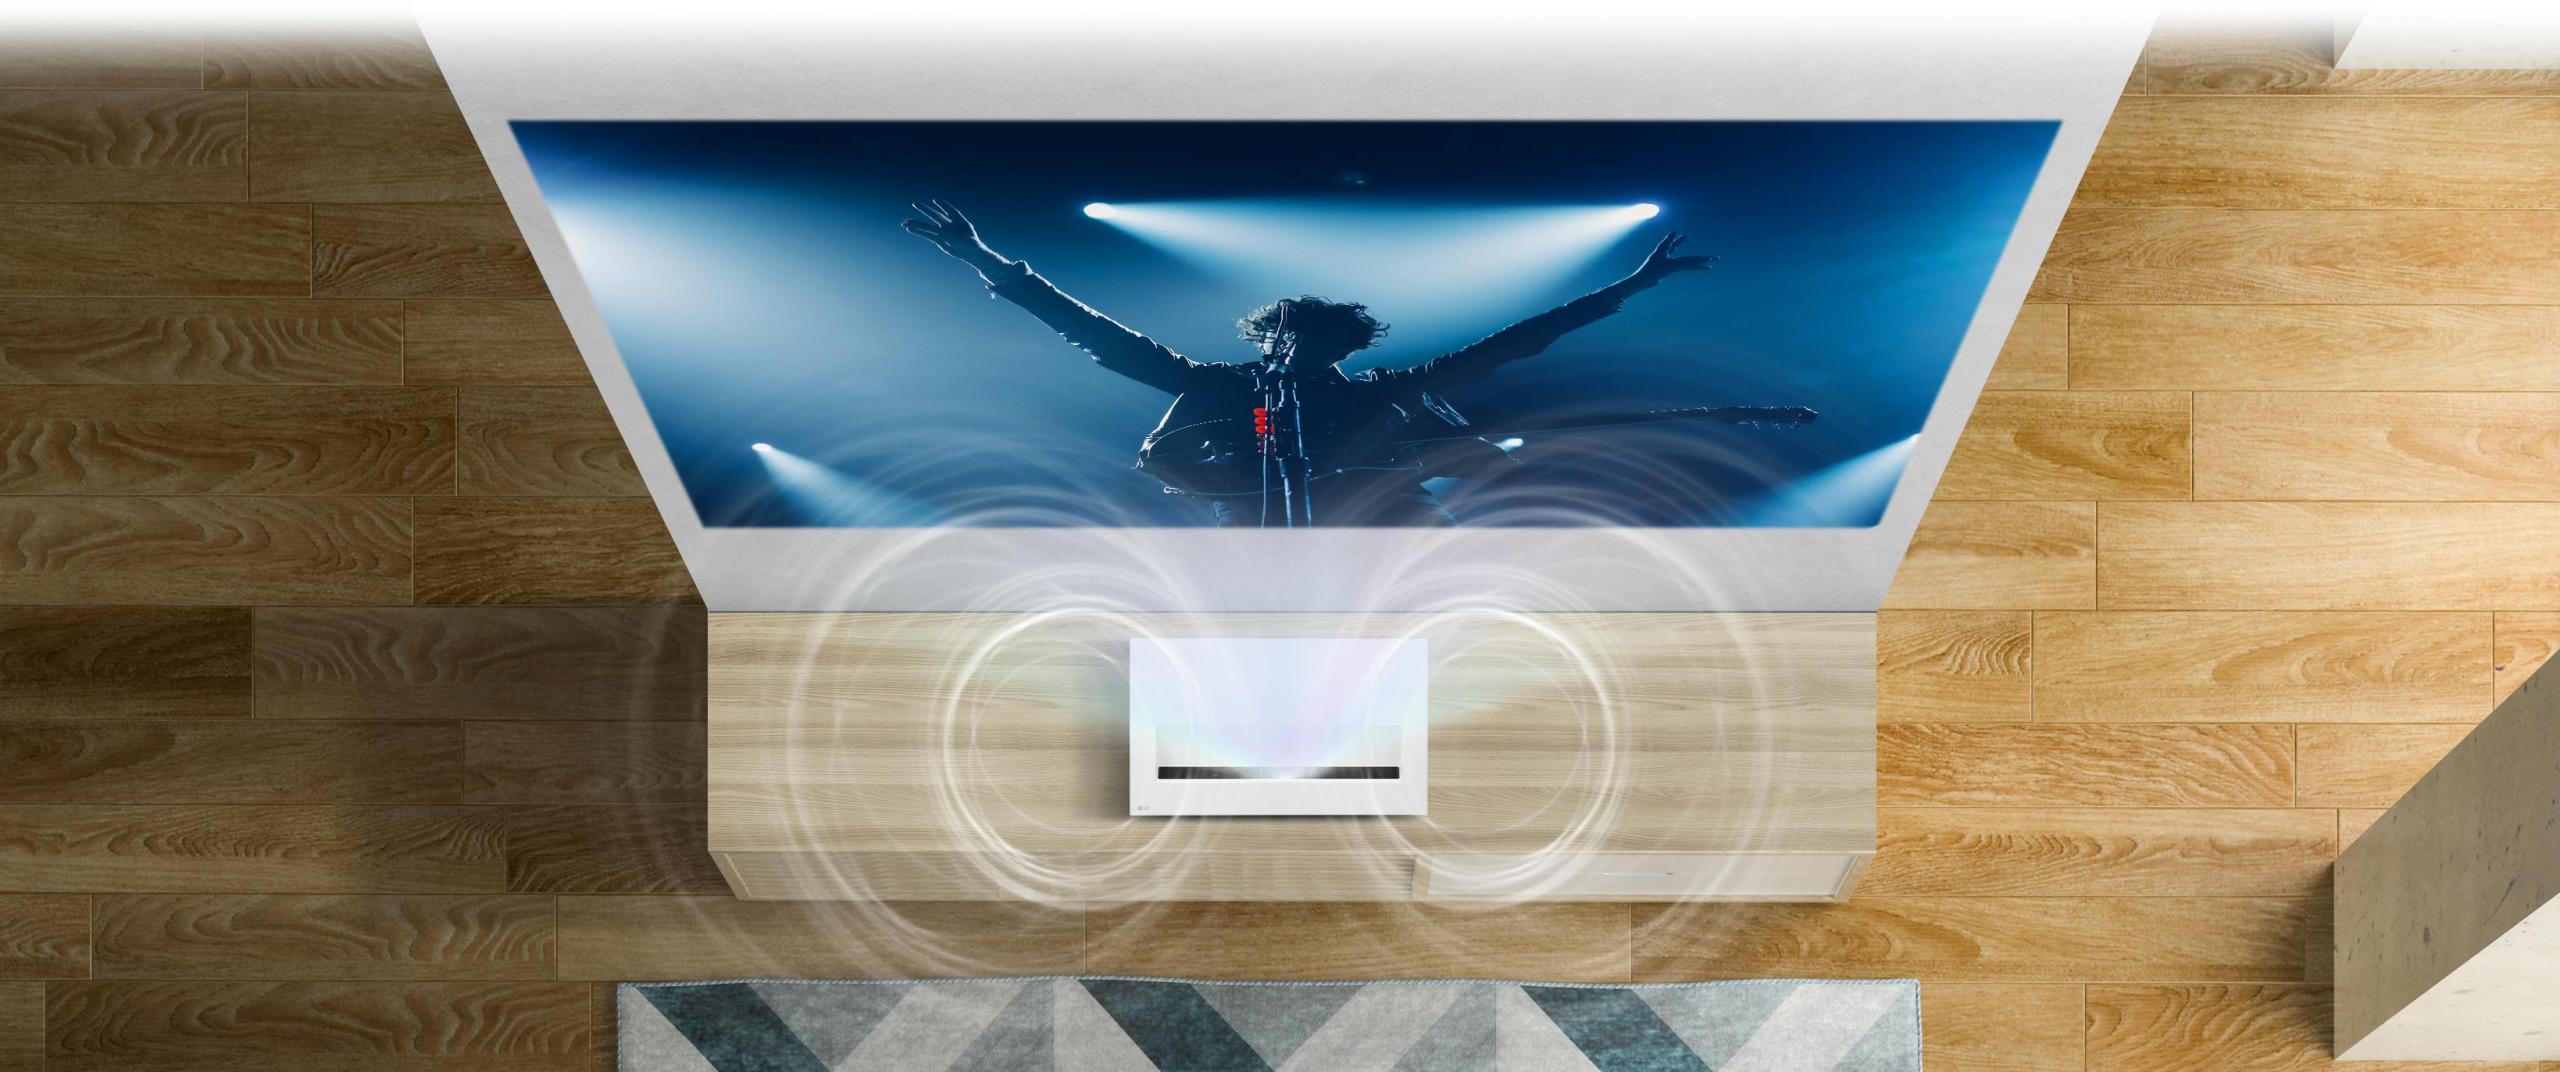

The HU715Q delivers an awe-inspiring viewing experience with an impressive screen size of up to 120-inches. The 120-inch screen size is larger than four standard 60-inch large screens. Dive in home and lets you become even more immersed in your content.

Stunning Cinema-quality Sound

2.2Ch 40W Sound with Quad Woofer

Thanks to 20W+20W stereo speakers and Quad Woofers, the HU715Q has a cinema-quality built-in sound system to complete your viewing experience. Four passive radiators are placed above and below the speaker to prevent vibration. Due to this structure, the HU715Q can provide deep and clean bass while minimizing any shaking in the screen and sound. With the improved 2.2Ch (quad woofer) 20W+20W speaker, you can enjoy a cinematic sound experience similar that of a real movie theater.

For More Immersive Sound

Bluetooth Surround Ready*

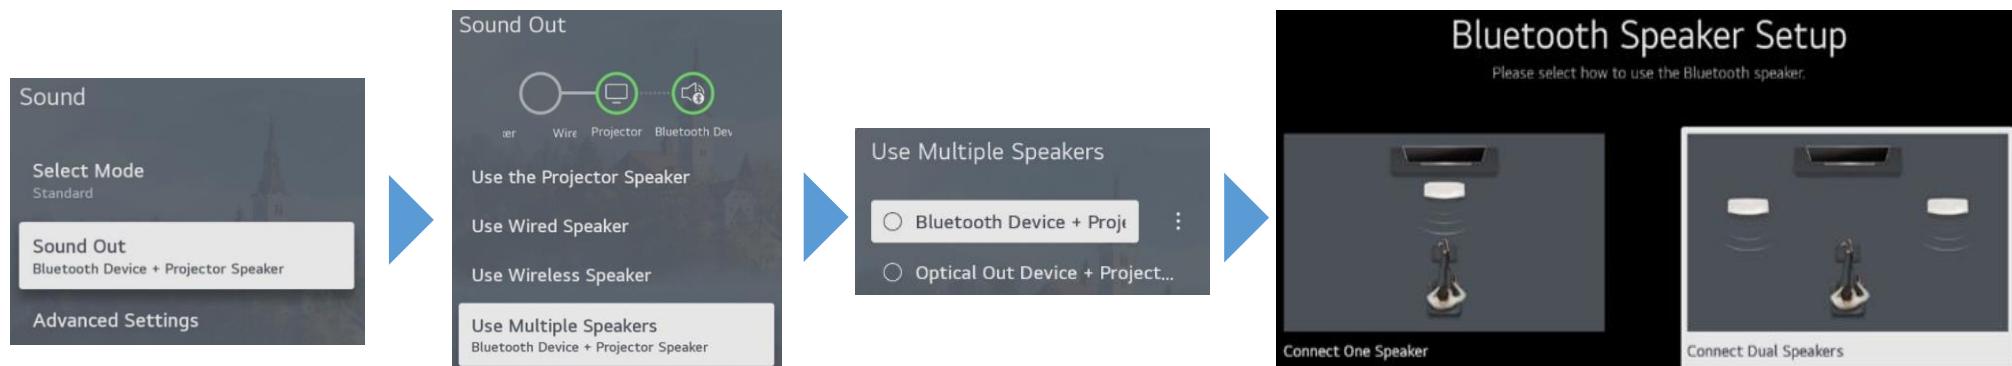

For a richer, more powerful movie sound experience, connect two extra wireless Bluetooth speakers to create a 4.2 channel sound system. Adding these two additional speakers to the powerful 2.2 channel speaker, built into the projector, will enhance your movie-watching experience with surround sound.

* Needs to purchase Bluetooth speakers to use this function. Only LG Bluetooth speakers are guaranteed.

* 4.2 channels effect : 2.2 Ch is implemented in virtual. Need to connect two Bluetooth speakers for 4.2 Ch effect.

Setup Guide for Bluetooth Surround Ready

1. In Sound Setting, click "Sound Out."

2. Click "Use Multiple Speakers."

3. Click "Bluetooth Device + Projector."

4. Select "Connect One Speaker" or "Connect Dual Speakers."

Supported Model List

LG-PK5 / LG-PK7

LG-PL5 / LG-PL7

LG-PM5 / LGa-PM7

LG-PN5 / LG-PN7

LG-RM2

LG RL3

LG RN5 / LG RN7 / LG RN9

LG ON5 / LG ON7 / LG ON9

Main Sound from Projector and Marginal Sound from Bluetooth Speaker

* The projector outputs the main voice, and the speaker transmits the surrounding voice.

* Bluetooth speaker can be set as Front/Rear.

Identical Sound out from both Projector and Bluetooth Speaker

* The projector and the Bluetooth speaker output the same audio.

* Bluetooth speaker can be set as Front/Rear.

CineBeam's Unique Brightness Optimizer II and Enhanced Convenience for Easy Installation

Brightness Optimizer II (Auto Brightness / Adaptive Contrast) | Motorized Focus | 4/9/15 Point Warping | Interior-friendly Design

Brightness Optimizer II further enhances the contrast ratio through Auto Brightness, which uses an Ambient Sensor and the Adaptive Contrast function to provide an optimized viewing experience regardless of users' lighting conditions.

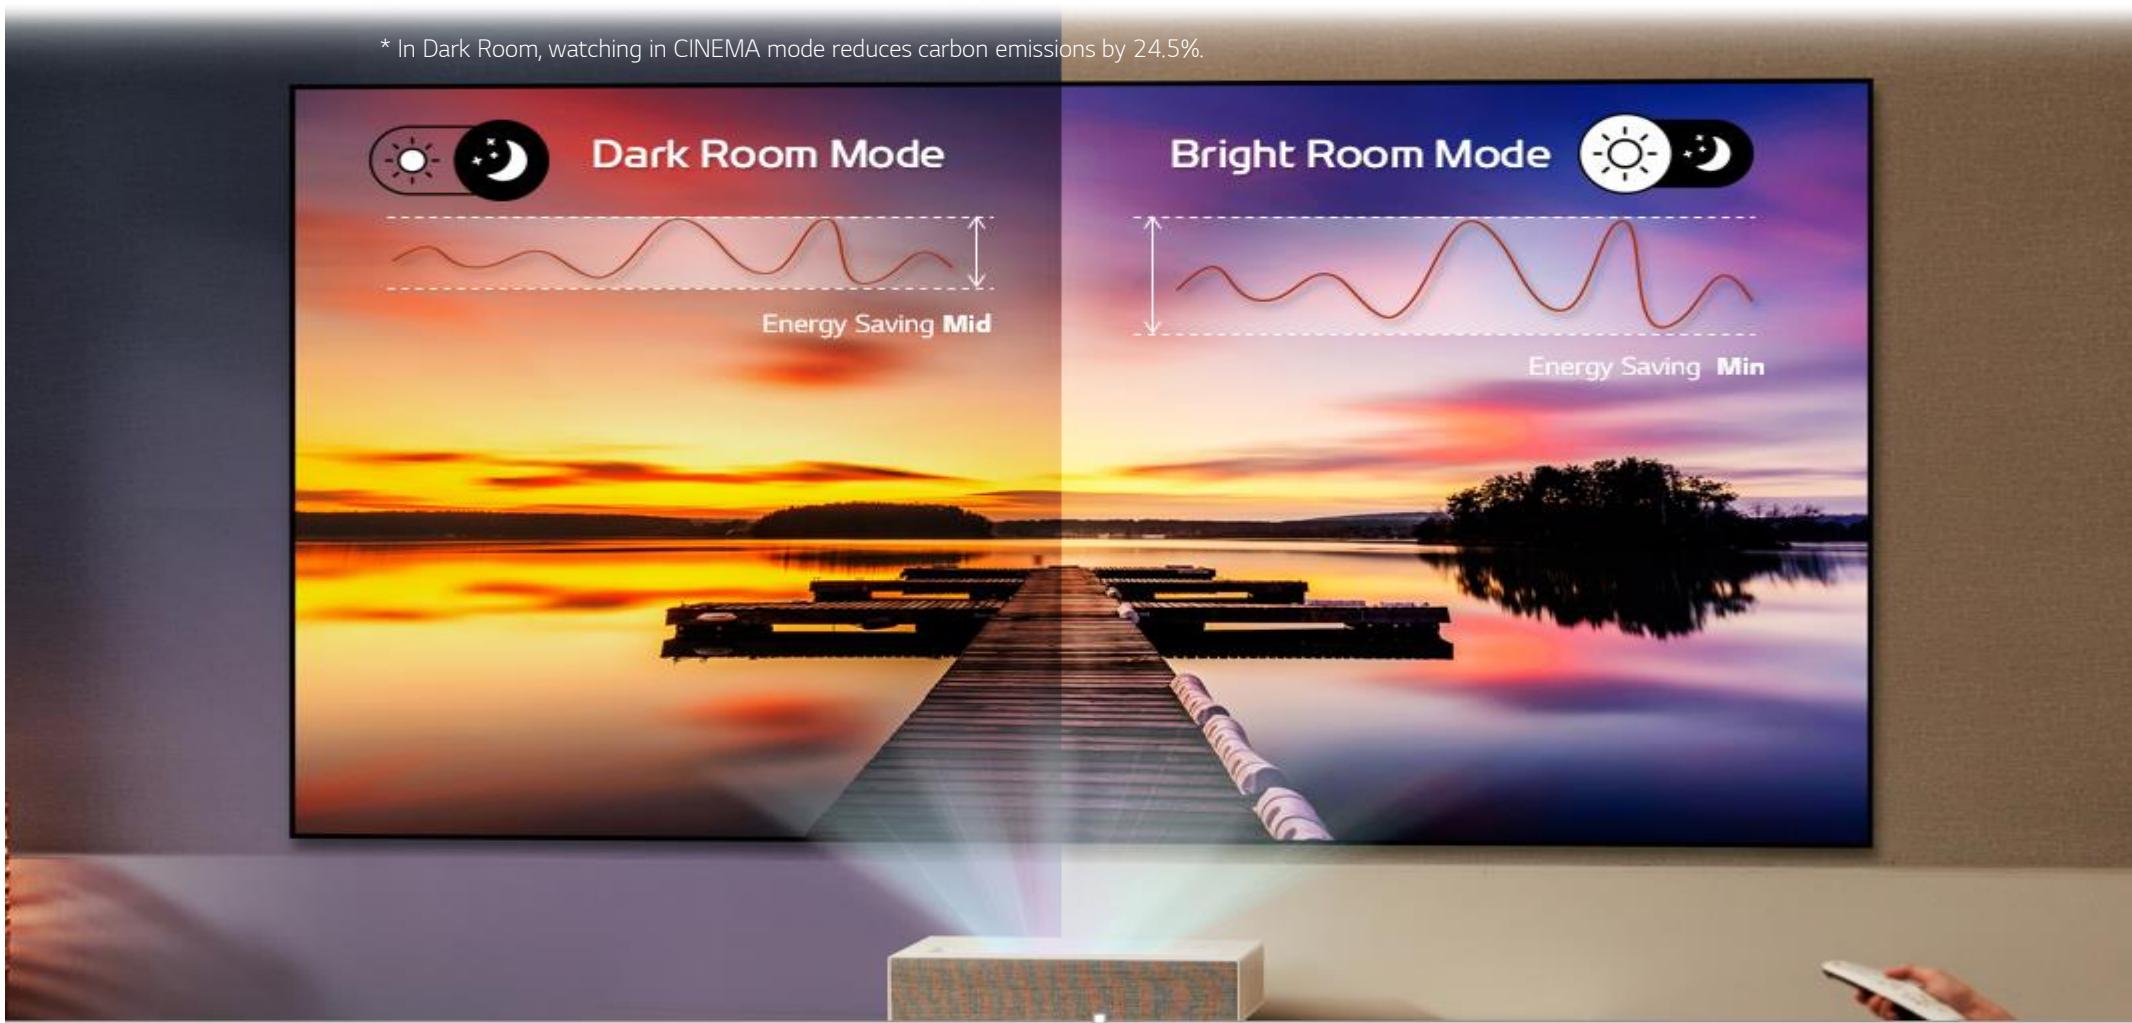

The HU715Q's simple adjustability with Motorized Focus and 4/9/15 Point Warping allows you to easily install your projector without limitations of your home spaces and still get the perfect fit for your screen.

Sleek and elegant design ensures that the HU715Q blends seamlessly into your home's interior.

Immersive Cinema Experience with Adjustable Brightness

Auto Brightness

The Auto Brightness feature, introduced for the first time in the HU715Q, automatically adjusts the brightness of the light source according to the projected image and the surrounding environment. This allows you to enjoy images with optimized brightness and quality no matter your surroundings. The Ambient Sensor at the bottom of the HU715Q is on, the ambient light environment is automatically recognized by the sensor and the energy saving level is set.

Vivid and Crisp Images with Brilliant Contrast

Adaptive Contrast

Adaptive Contrast gives your images more depth by adjusting the laser output to create a high contrast ratio whether your screen is bright or dark. Bright scenes appear brighter, while dark scenes remain detailed with deep blacks and shading details. Adaptive Contrast enables the projector to clearly reproduce colors that match the original image in any lighting conditions.

Adaptive Contrast

ON

When image is bright

: Full laser current, to make image bright

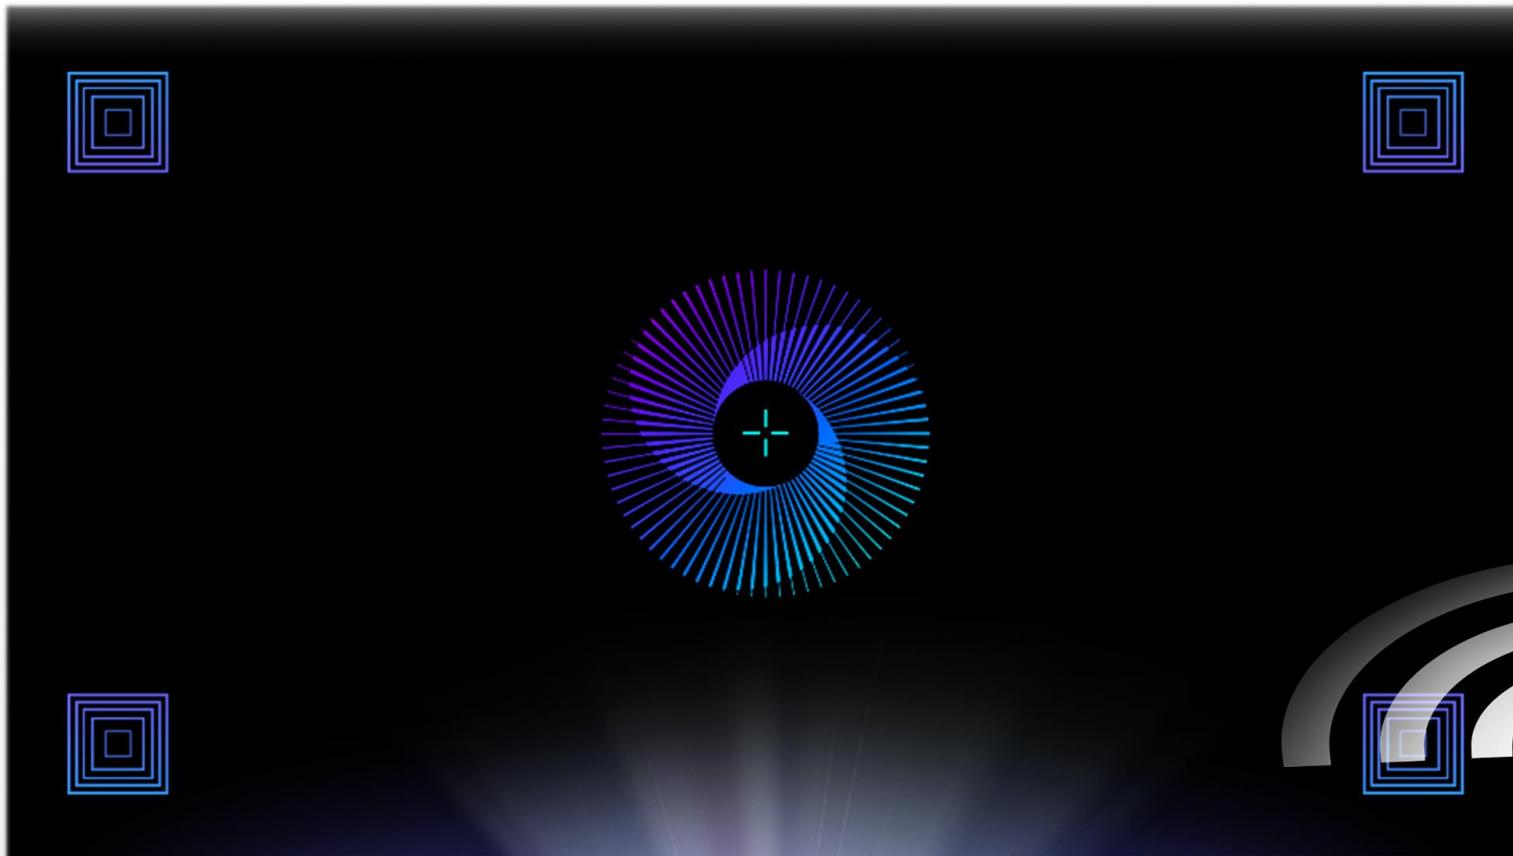

When image is dark

: Lower laser current, to make image darker

Remotely Adjust Projector Focus

Motorized Focus

You can easily adjust the focus by using the magic remote control. No longer to approach distant ultra-short throw devices to focus.

Focus Adjustment
for Every Angle

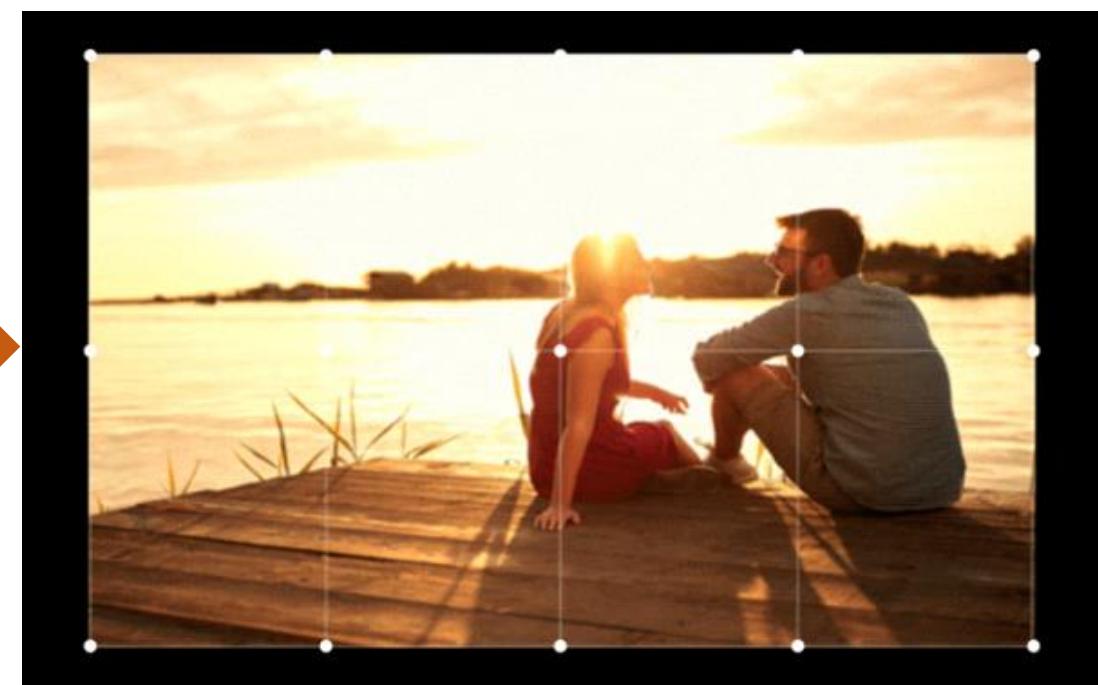

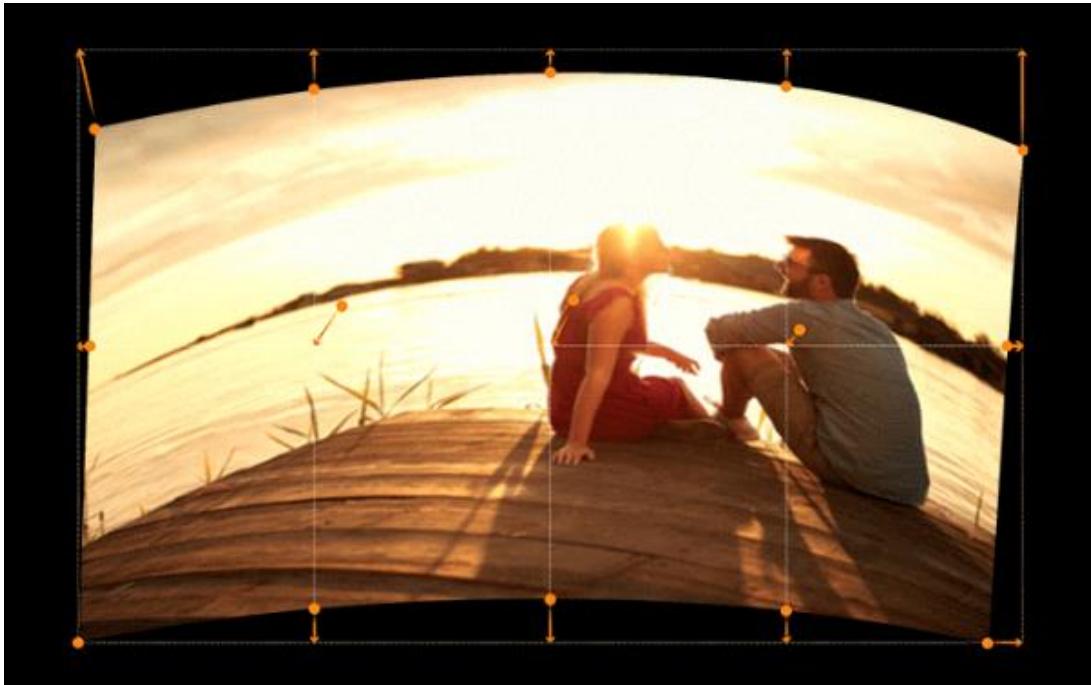

Perfect Screen Alignment

4/9/15 Point Warping

The HU715Q features Point Warping for easy horizontal and vertical alignment. Using these 15 points, you can ensure that your screen can be viewed without distortion and in the correct proportions, no matter what angle it is projected from.

15-Point Adjustment

Aesthetic Home Decor with Stylish Design

Interior-friendly Design (Kvadrat Canvas)

Unlike other conventional 4K laser projectors that feature large, bulky designs, the HU715Q's sophisticated design seamlessly blends in with your home decor. The harmony of Kvadrat's sustainable, gray canvas premium fabric accent, which is EU Ecolabel, Greenguard Gold, HPD, and EPD certified, combined with the clean white coloring of the projector to add an air of luxury and elegance to your home interior.

Enjoy a Wide Variety of Content for Longer with OTT Service, High Device Connectivity, and a 20,000 Hour Lifespan

Smart (webOS) | Apple AirPlay 2 & HomeKit | Screenshare | 20,000 Hour-long Lifespan

With the HU715Q, all you need is an internet connection to enjoy your favorite content quickly and comfortably. Stream 4K video from Netflix, Amazon Prime Video, Disney+, YouTube, and other services via applications available on webOS 6.0.

The HU715Q can connect to Airplay 2 and Screenshare,

allowing you to stream, mirror, control, and share content from your smartphone directly to your projector.

The HU715Q also works with Apple HomeKit so that you can easily manage your home cinema via your Apple devices.

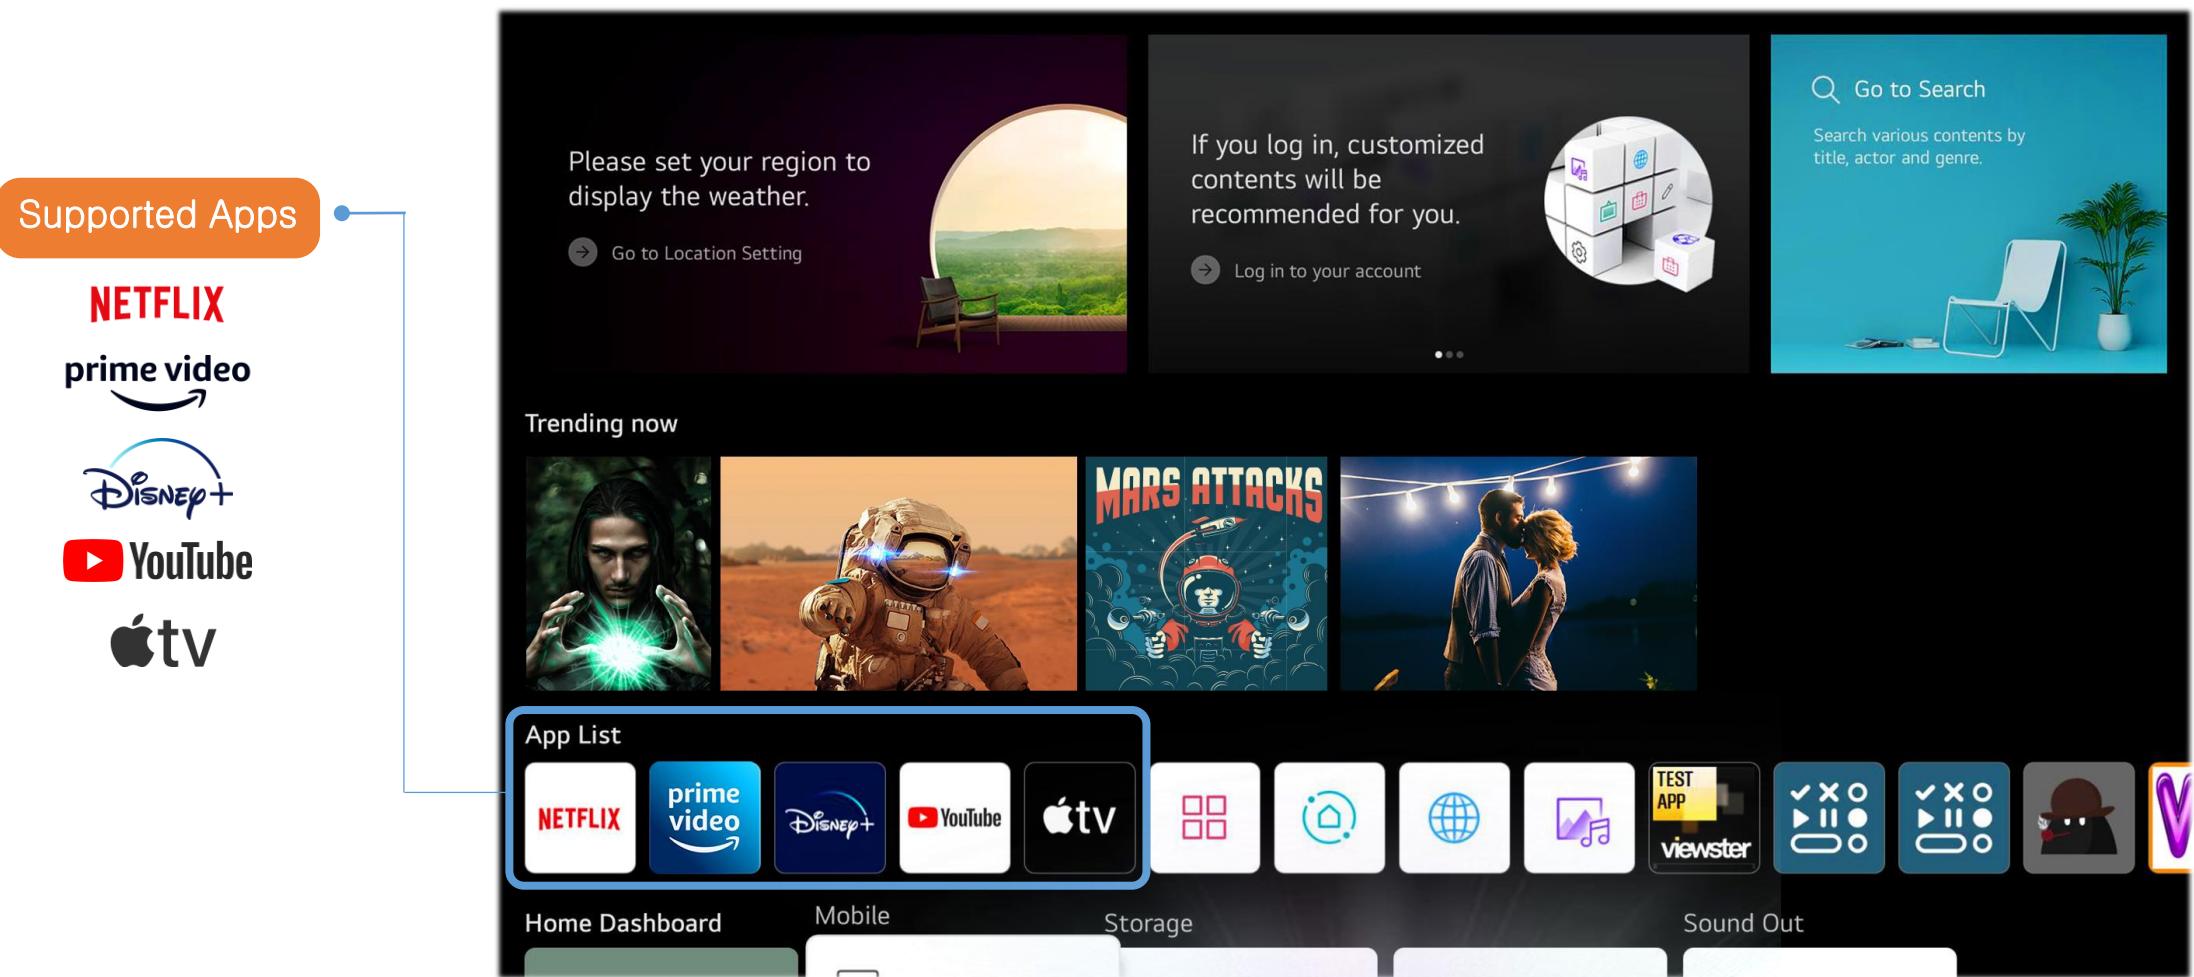

Thanks to its powerful light sources, the HU715Q has a 20,000 hour-long lifetime before bulb or lamp replacement is necessary.

This is the equivalent of 2-hour daily use over the course of 28 years.

A Smarter Way to Find Your Next Favorites

Smart (webOS)

LG's exclusive Smart TV platform, webOS 6.0, is simple to set up and makes it easier than ever to find great content on Netflix, Amazon Prime Video, Disney+, and YouTube. Finding your next favorite show or movie is easier than ever.

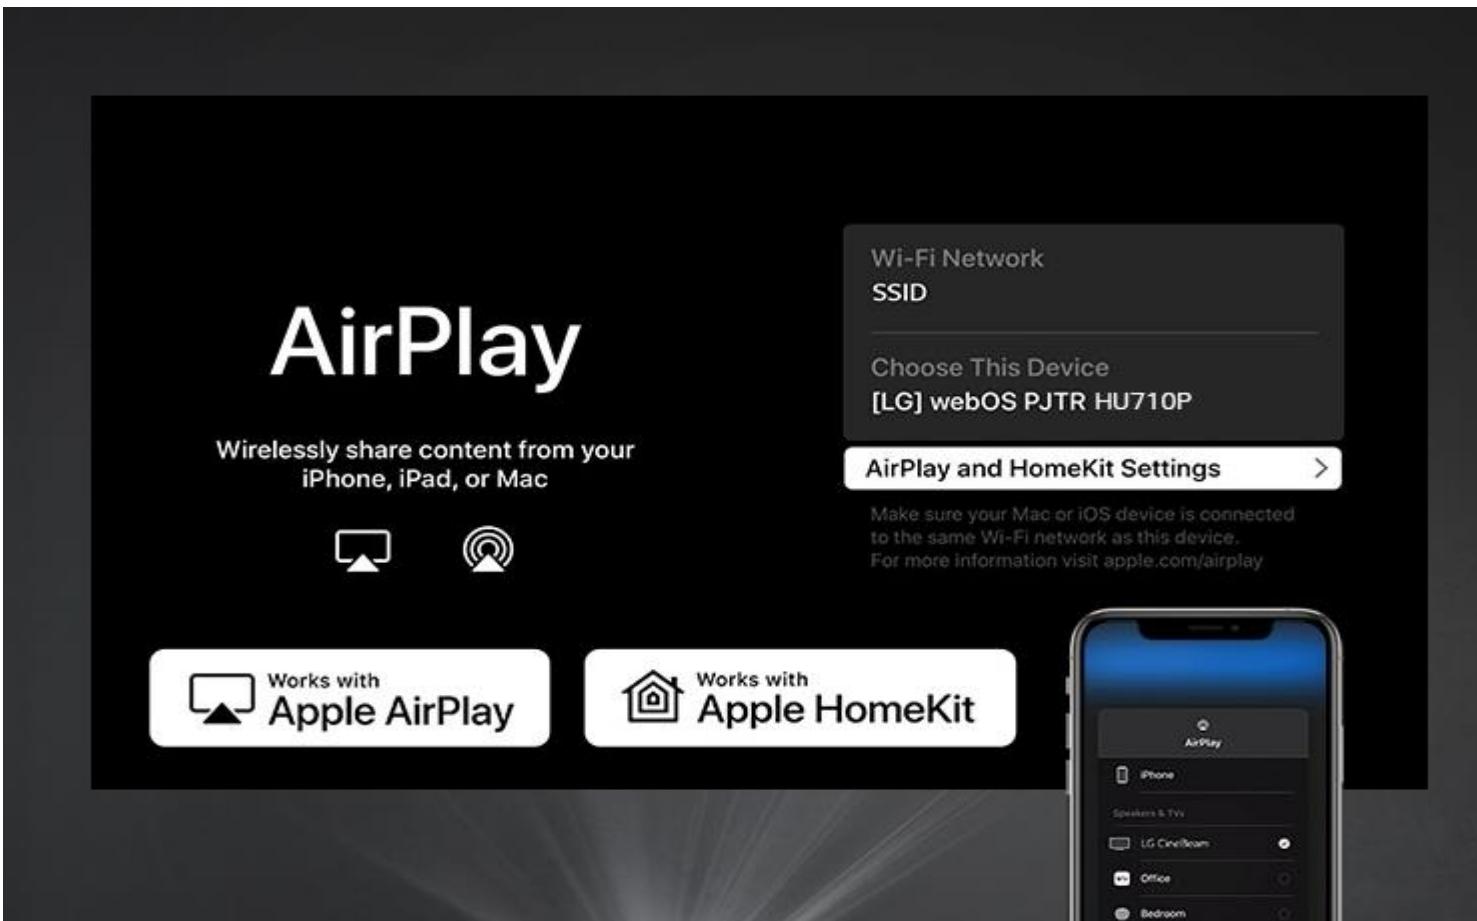

* Internet connection and subscription to streaming services are required.

* Supported services may differ by country.

More Convenient with Apple Connection

AirPlay 2

LG CineBeam provides AirPlay 2 capability without the need to buy an Apple TV. The HU715Q is certified AirPlay 2 compatible, so you can easily connect your phone and operate the projector wirelessly. AirPlay is a casting software that lets you mirror or stream content wirelessly from iOS and macOS devices to your projector. Now, enjoy everything you watch on the big screen.

* Your Apple device must be connected to the same Wi-Fi network as your projector.

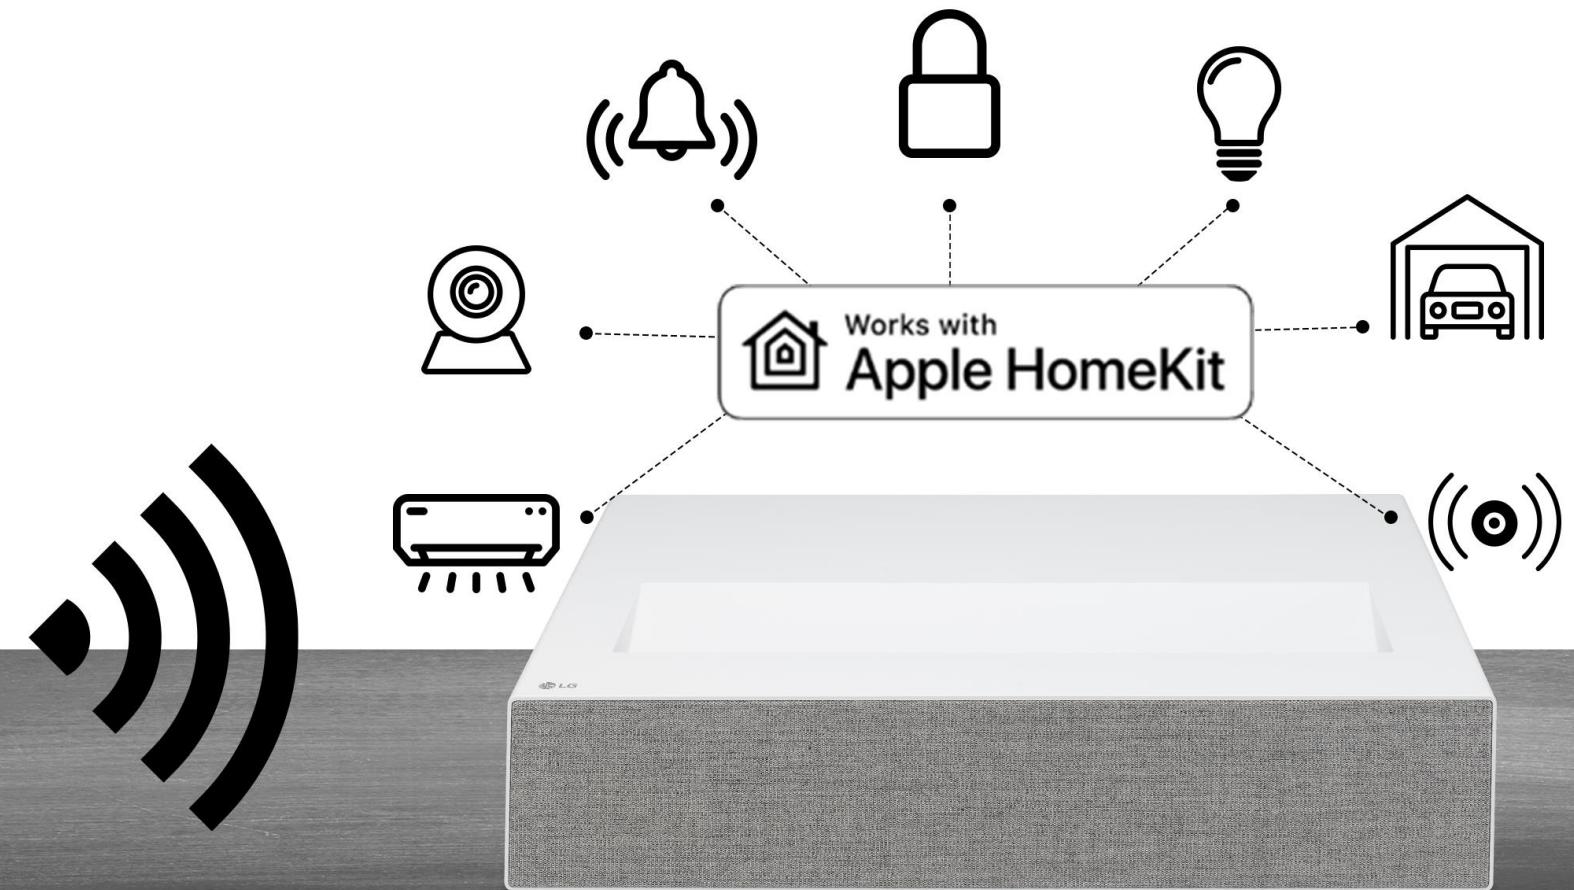

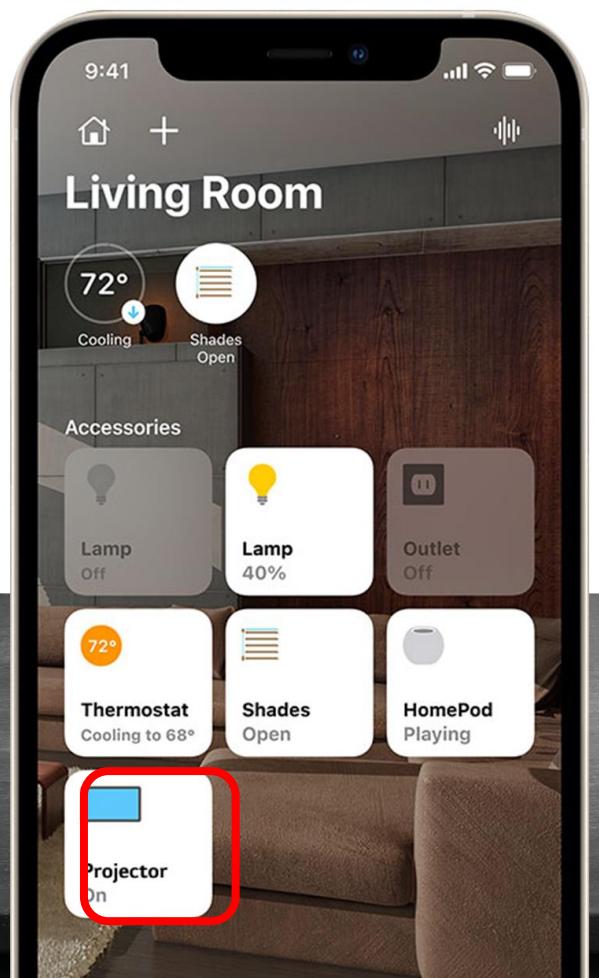

* Apple, the Apple logo, AirPlay, Apple TV, and HomeKit are trademarks of Apple Inc., registered in the U.S. and other countries.

* This LG CineBeam supports AirPlay 2 and requires iOS 12.3 or later or macOS 10.14.5 or later for use.

A Smarter Connection to Your Home

Apple HomeKit

The HU715Q works with the Home app, so you can easily and securely control your projector from all your Apple devices. The Home app ensures that all of your connected devices in your home work smarter for you.

* Your Apple device must be connected to the same Wi-Fi network as your projector.

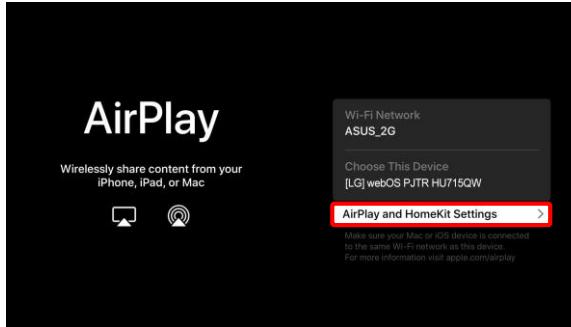

* Apple, the Apple logo, AirPlay, Apple TV, and HomeKit are trademarks of Apple Inc., registered in the U.S. and other countries.

* This LG CineBeam supports AirPlay 2 and requires iOS 12.3 or later or macOS 10.14.5 or later for use.

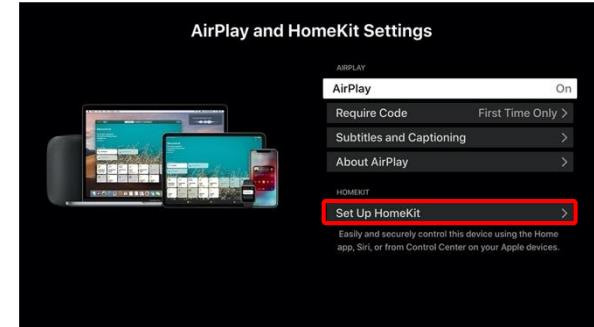

Setup Guide for Apple HomeKit

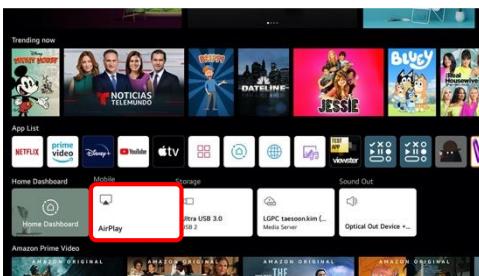

1-1. In Home Dashboard, click "AirPlay."

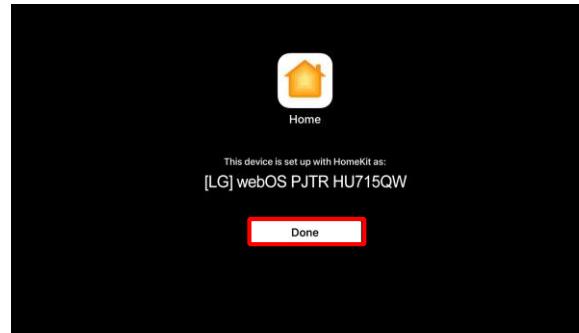

2. Click "AirPlay and HomeKit Settings."

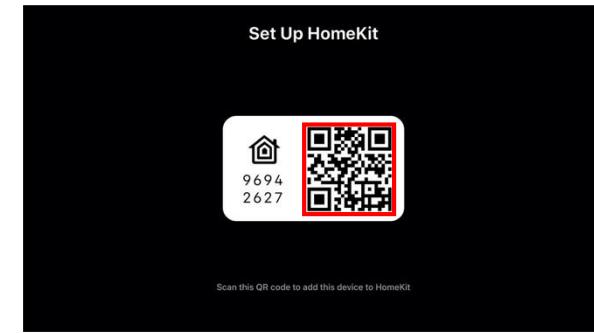

3. Click "Set up HomeKit."

1-2. On Explore Page, click "AirPlay."

5. Complete HomeKit setup on the HU715Q.

4. Scan the QR code using your iPhone.

* Your Apple device must be connected to the same Wi-Fi network as your projector.

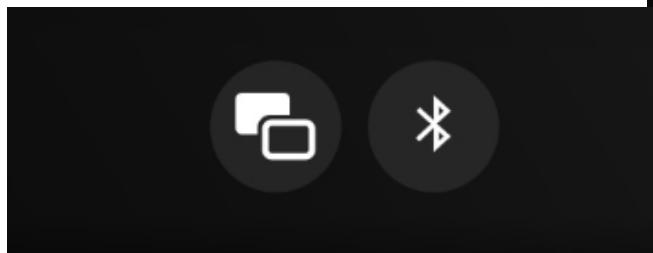

* Apple, the Apple logo, AirPlay, Apple TV, and HomeKit are trademarks of Apple Inc., registered in the U.S. and other countries.

* This LG CineBeam supports AirPlay 2 and requires iOS 12.3 or later or macOS 10.14.5 or later for use.

Screen Share + Bluetooth

Intelligent wireless connection

You can conveniently share the content and sound using wireless mirroring (Screen Share) and Bluetooth pairing.
